🪪 Profile

A passionate full-stack developer with 2+ years of experience crafting engaging web and mobile experiences. Proven ability to build high-quality, responsive applications from prototype to deployment. Driven by continuous learning and exceeding client expectations.

💼 Experience

Zummit Infolabs   11/2022 – 04/2023 | India
Full-Stack Web Developer
Description:
Cutting-edge AI/ML solutions for real-world challenges. From autonomous cars to disease prediction, we tackle diverse problems across industries using tools like GANs, NLP, and Transformers.

Achievements:
- Assisted in the development and implementation of three key web applications: Online Chat App, Online Resume Builder, and Workforce Management System.

- Actively participated in meetings and provided valuable insights during brainstorming sessions.

- Received positive feedback for excellent communication and teamwork skills.

- Adapted quickly to new technologies and tools, showcasing a strong aptitude for learning.

Freelancer   12/2021 – present
Software Developer
Description:
Delivered engaging websites and intuitive mobile apps for diverse clients, efficiently driving user engagement and exceeding expectations, all while leveraging cutting-edge technologies and managing projects from concept to completion.

Achievements:
- **Metaverse Madness Landing Page:** Designed and developed an immersive landing page for a Metaverse project, showcasing its potential and captivating users.

- **E-commerce Website for Earphones, Headphones & Speakers:** Built a sleek and user-friendly e-commerce platform, boosting sales and brand recognition for an audio equipment company.

- **Fitness App with Full Functionality (ReactJS):** Created a feature-rich fitness app leveraging ReactJS, empowering users to achieve their fitness goals and track progress.

- **Alva AI Voice Assistant Android Application:** Developed an innovative AI voice assistant app (Alva) for Android, enhancing user experience and simplifying daily tasks.

- **Android Movie Land Application:** Built a user-centric Android app ("Movie Land") for movie enthusiasts, facilitating movie discovery and ticket booking.
- **Uber Clone Mobile Application:** Conceptualized and implemented a user-friendly Uber-like mobile app, showcasing expertise in building on-demand platforms.
- **Android Trip Booking App:** Successfully delivered a feature-rich travel booking app for Android, streamlining the trip planning process for users.
- **Android Tesla app:** Created a unique Android app for managing Tesla vehicles, demonstrating competence in building custom functionalities for connected devices.
- **Android NFT Marketplace:** Developed a secure and intuitive NFT marketplace app for Android, enabling users to buy, sell, and manage digital assets.
- **Sociopedia MERN SocialMedia App:** Built a powerful social media platform ("Sociopedia") using the MERN stack, fostering user engagement and community building.

🎓 Education

B.Tech Computer Science & Engineering   09/2019 – 08/2023
*Jain University*   Banglore, India
Received a well-rounded education in Computer Science & Engineering at Jain University, gaining proficiency in JavaScript, Java, Kotlin, C++, Python, and PHP, along with a strong foundation in theoretical concepts.

🧠 Skills

| React JS | Next JS | Redux | JavaScript (ECMAScript 6) | TypeScript |

| Kotlin | Java | Python | PHP | Node JS (Express JS) | MongoDB |

| React Native | Android Studio | Tailwind CSS (NativeWind) | Bootstrap |

| CSS (SASS) | HTML | Git | Responsive Web Design | Firebase | Linux |

| Adobe Photoshop | Figma | Problem Solving | Project Management |

| Unit Testing | Networking Fundamentals |

📂 Personal Projects

GPT AI Summarizer
A web application that uses GPT-3 to generate concise summaries of long-form text

CarHub
A web application that provides car-related content, including news, reviews, and pricing information.

HooBank React Application
A React application for a bank that has a modern UI.
